

CSE/PC/B/S/314 Computer Networks Lab

Assignment 4: Implement CDMA with Walsh code.

Due on: 05-09 October 2026

Report submission due on: next lab class

Use the same sender-receiver design as previous assignments.

In this assignment you have to implement CDMA for multiple access of a common channel by n stations. Each sender uses a unique code word, given by the Walsh set, to encode its data, send it across the channel, and then perfectly reconstruct the data at n stations.
